

Error Log

```
36 // Calculate and display average grades for each test
37 for (int test = 0; test tests; test++) {
38     System.out.println("Average grade for Test " + (test + 1) + ": " +
39         gradeBook.testAvg(test));
40 }
41
42 scanner.close();
43 }
44 }
45
```

I had forgotten to add the "<" sign causing an error code.

```
36 // Calculate and display average grades for each test
37 for (int test = 0; test < tests; test++) {
38     System.out.println("Average grade for Test " + (test + 1) + ": " +
39         gradeBook.testAvg(test));
40 }
41
42 scanner.close();
43 }
44 }
45
```

To fix this I just added the sign into the code.
